

Making the Right Choice

RAMS Insulation

Choices of materials and construction methods can significantly change the amount of energy embodied in the structure of a building.

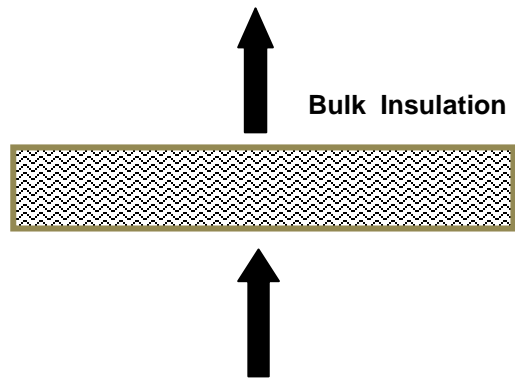

Installing Rams Insulation correctly will in turn act as a barrier to heat flow. Choosing the correct rating for your application is crucial in achieving savings year round, cutting down heating and cooling appliances will also assist in reducing greenhouse gas emissions.

Choosing Wool Insulation will not only work as a heat barrier but will also fight against condensation.

Visit *BCA Thermal Rating Guide*: www.abcb.gov.au

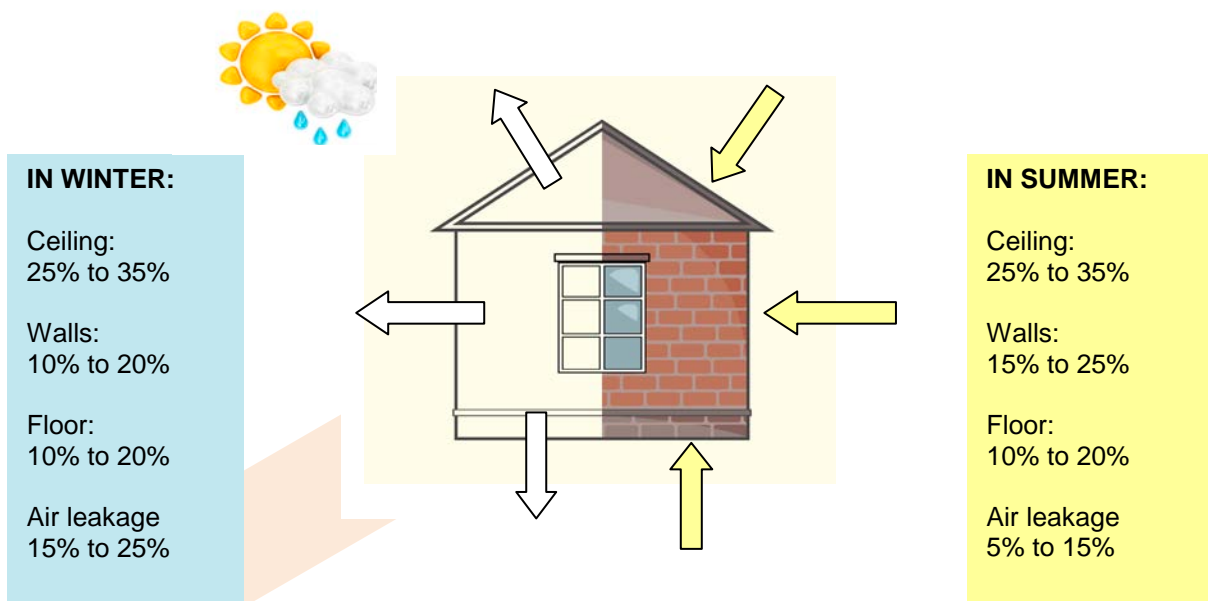

How Bulk Insulation Works:

Rams Bulk Insulation mainly works by trapping dry air flow. Bulk Insulation materials can trap large amounts of air, reducing the ability for heat to be transferred by conduction.

Be Cool in Summer and Warm in Winter

Typical heat gains and losses in a temperate climate

RAMS Insulation Pty Ltd

PO Box 68 Tullamarine 3038

Melbourne Australia
